DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-13, 26 and 27 as they applies to claims 1, 5, 6, 9, and 13, and 28 as it applies to claims 1, 5, 6, 9, and 13, drawn to collapsible structures especially wheeled structures, classified in class 280, subclass 47.34.
- II. Claims 14-18, 28 as it applies to claims 14-16, 29, and 30, drawn to collapsible cribs and play pen/beds, classified in class 5, subclass 99.1.
- III. Claims 19 and 28 as it applies to claim 19, drawn to collapsible animal crates, classified in class 119, subclass 452.
- IV. Claims 20-25, 26 and 27 as they applies to claim 20, and 28 as it applies to claim 20, drawn to collapsible playhouses or protective shelters, classified in class 135, subclass 126.

The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III, and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are used separately for different purposes with different operations and functions.

Art Unit: 3618

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each group is not required for the other groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

In addition, inventions I, II, and III contain claims directed to the following patentably distinct species of the claimed invention:

Invention I includes the following species as depicted in the figures:

- | | |
|--------------------|--------------------|
| 1. Figure 1 | 7. Figure 12 |
| 2. Figures 3 and 4 | 8. Figure 15 |
| 3. Figure 7 | 9. Figures 16-19B |
| 4. Figure 8 | 10. Figures 20-22B |
| 5. Figure 9 and 10 | 11. Figure 24 |
| 6. Figure 11 | |

Invention II includes the following species as depicted in the figures:

- a. Figures 25-28

Art Unit: 3618

b. Figure 33

Invention III includes the following species as depicted in the figures:

C. Figures 13 and 14

D. Figure 29

After electing one of inventions I-IV, Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from the group corresponding to the elected invention for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record

Art Unit: 3618

showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Christopher Bottorff whose telephone number is (703) 308-2183. The examiner can normally be reached on Mon.-Fri. 7:30 a.m. - 4:00 p.m..
